Small MyCricket scoreboard examples

Yinnar CC 

You'll have multiple layouts to choose from with Solid

*Do you have a video screen scoreboard but terrible software?
Upgrade to Solid systems...*

 Norwood CC

<< Before - After >>

Flexibility!

YOU get what YOU want on your scoreboard.

Your scoreboard will be a proud addition to your club & the local community. Strive for the absolute best result... A beautiful Solid Scoreboard!

- As we all know, cricket has many variables. You should be able to be involved in your "layout design" process.
- Depending on 1. the game format, & 2. the moment in the game, you might want specific detail on your scoreboard to suit. With Solid you can have as many different layouts as YOU want. Just tell us your needs and we'll design your layouts.
- If you personally want the flexibility to design your own scoreboard layouts we can grant you "layout access" and give you basic training to start.
- These samples here are dependent on which software or apps you are using. Example: the lower sample requires TCS, the Solid Interface interprets TCS data and creates the scoreboard output. Our interface also "watches" the data. When an event occurs (over, four, etc.) the system can automatically switch to an animation and/or sponsor logo. The third sample is dependent on Solid's Player Trigger app where the head-shots are stored. We will match the apps required to your needs & wants.

NOTES:

- Scoreboard mockups scaled to 7.0 x 5.0m
- Advertising shown automatically changes (preset seconds), To add adverts simply drop logos into set folders
- Some cricket data is limited by the scoring system, ie. MyCricket does not have as many data fields as TCS.

Clarence 1st innings 3:54
