Link your scoreboard directly to PlayHQ

solid SCOREBOARDS

NEW for 2023

solid PlayHQ interface

solid INTERFACE

PlayHQ

- No more double-entering, just score as normal on your PlayHQ system. Your scoreboard will change **automatically!**

- Besides the scores changing you can also have the usual Solid graphics and <u>sponsor ads</u> running automatically.

- Multiple layouts can be designed to suit your club needs & your scoreboard readability.

- Not limited to Solid brand scoreboards

- Solid can offer you "layout access" should you wish to "take the reins" with your designs.

What you need...

- A "video" style scoreboard screen

- Solid PlayHQ interface software (a yearly subscription)

- An internet connection (PlayHQ is a cloud based system)

- A PC connected to the scoreboard (usually existing PC, or Solid can provide if required)

   - This is where our Solid software will be loaded

   - This PC requires an internet connection. If this is difficult then Solid can assist with a 4G modem setup.

- A device for your scorer to use with the PlayHQ live scorer app (provided by the club). This can be a PC, tablet, phone or Mac.

Link with Solid's Player-Trigger app to automatically incorporate player headshots into your scoreboard layouts
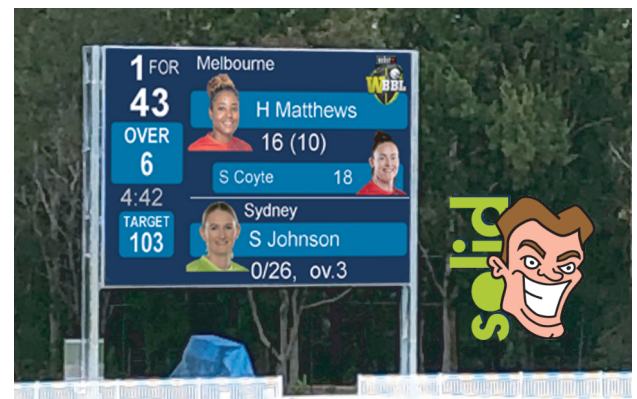

What you don't need...

- Your existing bluetooth adapter device (if you have one)

   - MyCricket will no longer be usable

   - PlayHQ is not bluetooth - PlayHQ is cloud-based giving your scorer's more freedom to score where they wish (internet required).

Solid's PlayHQ Interface is tried and tested. Live matches in NSW, TAS & NZ occured after xmas in the 22/23 season.

Subscription pricing

- There are different subscriptions to suit your venue/s.
