When there is a theoretical reason for two "Primary Scorers" (like a multi-league / inter-league competition). The leagues & scorers will have to decide who will be the Primary scorer. The PlayHQ system does not support 2 scorers logged in as the Primary scorer.

The sample to the left shows a single match, on the same oval (venue) displaying on pages for two different competitions.

However, as below - **the scoreboard will not work** (frogbox may also fault?).

At this point in time, the only solution will be to stop scoring as Primary scorer on one of the two sites.

The scoreboard will then come to life.

Viewers searching for online scores will hopefully check the other online option (if they are aware of the 2 competing league clubs).

If you are scoring via a single Primary Scorer on one of the league sites then also point your frogbox to that same feed.
